

# Operator dialogue terminals

Magelis display units with 2 line alphanumeric screen

## Characteristics

References :  
page 9  
Dimensions, mounting :  
page 30

Type of display unit	<b>XBT-H0●2●10 (fluorescent)</b>	<b>XBT-H811050 (LCD)</b>	<b>XBT-H0●1010 (back-lit LCD)</b>
----------------------	----------------------------------	--------------------------	-----------------------------------

### Environment

Conforming to standards	IEC 1131-2, IEC 68-2-6, IEC 68-2-27, EN 61131-2, UL 508, CSA C22-2 no. 14		
Product certifications	CE, UL, CSA		
Temperature	Operation	0...+ 50 °C	
	Storage	- 40...+ 70 °C	- 20...+ 60 °C
Degree of protection	IP 65, conforming to IEC 529, Nema 4		

### Mechanical characteristics

Mounting and fixing	Flush-mounted, fixed with 4 or 6 screws (supplied) pressure-mounted (on a 1 to 6 mm thick panel)							
Material	Enclosure	Polyphenyl oxide, 10 % glass fibre (PPO GFN1 SE1)						
	Keypad	Anti-UV treated toughened polyester (Autoflex EB AG)						
Keys	XBT-H	<b>002010</b>	<b>022010</b>	<b>012●10</b>	<b>811050</b>	<b>001010</b>	<b>021010</b>	<b>011010</b>
		No key	4 function keys + 1 service key	5 service keys	5 service keys	No key	4 function keys + 1 service key	5 service keys

### Electrical characteristics

Display unit	Fluorescent green matrix characters (5 x 7 pixels) - 2 lines of 20 characters, height 5 mm	LCD (5 x 7 pixels) - 2 lines of 20 characters, height 9 mm	Back-lit LCD (5 x 7 pixels) - 2 lines of 20 characters, height 9 mm
Power supply	Voltage	--- 24 V not isolated	--- 24 V not isolated (during configuration) --- 5 V via TSX Nano/Micro/Premium PLC terminal port (during operation)
	Voltage limits	18...30 V	
	Ripple	5 % maximum	
Consumption	10 W	1.5 W	10 W

### Operating characteristics

Signalling	XBT-H	<b>002010</b>	<b>022010</b>	<b>012●10</b>	<b>811050</b>	<b>001010</b>	<b>021010</b>	<b>011010</b>

# Operator dialogue terminals

## Magelis terminals with graphic screen

### General

Characteristics :  
pages 20 and 22  
References:  
pages 21 and 23  
Dimensions :  
page 31

### Presentation

Graphic screen operator dialogue terminals are available with 5" or 10" screens, in monochrome or colour, with a keypad or a touch-sensitive screen.

XBT-F graphic screen terminals are specially designed for operator dialogue graphic functions.

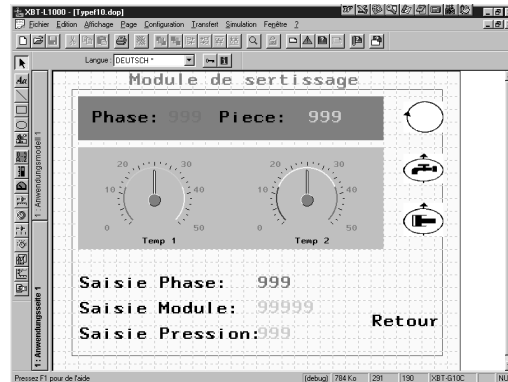

TXBT-F graphic stations operate under Windows 95, enabling them to access other control system functions.

### Operation

All Magelis graphic screen terminals have the same user interface : static and soft function keys, service keys, alphanumeric keys.

### Configuration

Magelis graphic screen terminals can be configured using the same XBT-L100 software in a Windows environment.

XBT-L100 software provides graphic screen terminals with a library of animated graphic objects such as bargraphs, volume indicator meters, selectors, potentiometers and trending curves.

The variable for animating an object can be selected directly from a list of symbols given by the PL7 or Concept software.

The application program for the graphic terminals is stored on a PCMCIA memory card.

### Communication

XBT-F and TXBT-F graphic screen terminals communicate with PLCs via an integrated point-to-point or multidrop serial link, or via a fieldbus with a PCMCIA type III card.

The communication protocols are those used by Schneider Group PLCs as well as those of the other main market suppliers.

Dimensions :  
page 31

### Functions

#### Functions

XBT-F and TXBT-F graphic screen operator dialogue terminals have the following functions :

- Display of animated synoptic screens, control, modification of numeric and alphanumeric variables
- Display of a service line (status and alarm bar) with the current time
- Dynamic visualisation of operating data (setpoints, measurements, recipes, maintenance messages) and process errors
- Control via soft or static function keys
- Scaling of analogue variables
- Real-time and trending curves
- Alarm log and management of alarm groups
- Management of help pages, form pages, recipe pages
- Pages can be called by the user or by the PLC
- Three levels of password
- Printing of form pages, date-stamped log and alarms
- Communication protocol application support in the PCMCIA type II application memory card

The role of the function keys is defined using the XBT-L100 software. Modifications cannot be made during operation. Each function key can be associated with an internal bit of the PLC application.

#### Static function keys

Static function keys are defined for the whole application.

They can be used for :

- Access to a page
- Pulse a PLC memory bit
- Latch a PLC memory bit

Static keys can be marked with re-usable labels.

#### Soft function keys

Soft function keys are associated with a page. Their role can differ from one page to another.

They can perform the following functions :

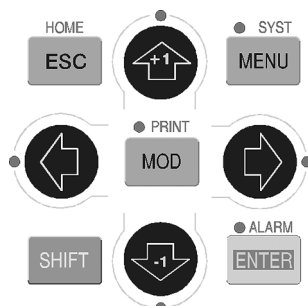

- Access to a page
- Pulse a PLC memory bit
- Latch a PLC memory bit
- Access to the modification of a value

Each soft key can be assigned a label or icon displaying its function.

#### Service keys

Service keys are the "arrow" keys and the control keys and are used for modifying the parameters of the control system. The control keys are used to perform the following actions :

<b>ENTER</b>	Confirm a selection or entry, acknowledge an alarm
<b>MOD</b>	Change to the mode for entering pages, passwords, fields or graphic objects
<b>ESC</b>	Cancel an entry, suspend or stop a current action. Display previous pages in succession. Quit the alarm display.
<b>SHIFT</b>	Access the second of the dual key functions
<b>MENU</b>	Access a menu containing the operating functions which do not have direct access keys
<b>HOME</b>	Return to the entry point of the current menu. Example : return to the first page of the application.
<b>SYST</b>	Access confidential mode which contains the implementation functions protected by a password
<b>ALARM</b>	View the alarms
<b>PRINT</b>	Print

The "arrow" keys can be used to :

- Change page within a menu
- Change fields on a page
- Select an object on a page
- Move around on a page
- Select the value of a digit
- Select a value from a list of choices
- When used with the **SHIFT** key, increment or decrement the value of a variable field

### Description

#### Front panel of XBT-F01/F02 keypad terminals

XBT-F01/F02 keypad terminals comprise on the front panel :

- 1 A monochrome or colour screen (5.7" or 9.5" or 10.4" depending on the model)
- 2 2 x 4 or 2 x 5 (depending on the model) soft function keys with indicator lights
- 3 A communication monitoring indicator light
- 4 A keypad activity indicator light
- 5 2 x 5 or 2 x 6 (depending on the model) static function keys with indicator lights and re-usable labels
- 6 Twelve service keys with indicator lights
- 7 Twelve alphanumeric keys (0...9, +/-, .) associated with 3 alphabetical access keys (A...Z).

#### Front panel of XBT-F03 touch-sensitive screen terminals

XBT-F03 touch-sensitive screen terminals comprise on the front panel :

- 1 A touch-sensitive colour screen (5.7" or 10.4" depending on the model)
- 2 A communication monitoring indicator light
- 3 A tactile feedback activity indicator light

#### Back panel of XBT-F graphic screen terminals

XBT-F graphic screen terminals comprise on the back panel :

- 1 A plug-in screw terminal for 24 V power supply, and alarm relay connection
- 2 A female 25-way SUB-D connector for connection to PLCs
- 3 A male 9-way SUB-D connector for printer connection and for transferring applications from an FTX terminal or PC compatibles
- 4 Two slots for PCMCIA card :
  - one type II for application memory
  - one type III for connection to the communication architecture (bus or network)

### Description

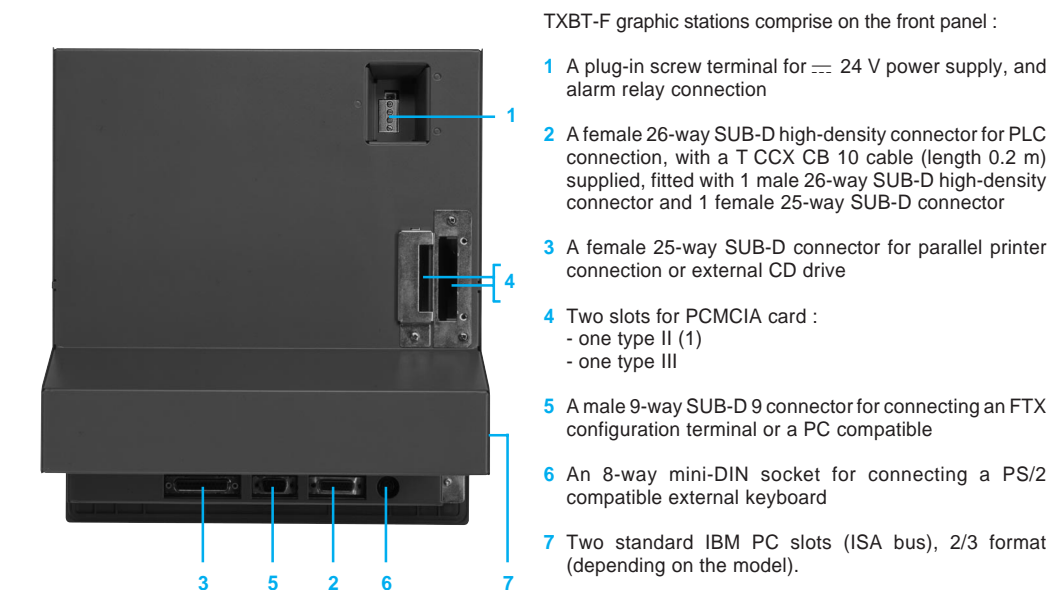

#### Front panel of TXBT-F02 graphic keypad stations

#### Front panel of TXBT-F03 graphic screen terminals with touch-sensitive screens

#### Front panel of TXBT-F graphic stations

(1) The operator dialogue application memory can be supported by a PCMCIA type II card (10 Mb maximum) or by the internal hard disk (2.1 Gb).

### Characteristics

References :  
page 21  
Dimensions :  
page 31

Type of terminal	XBT-F011	XBT-F032	XBT-F023/F024	XBT-F034
<b>Environment</b>				
<b>Conforming to standards</b>	IEC 1131-2, IEC 801-2 level 3, IEC 801-3 and IEC 801-4 level 3, IEC 68-2-6, IEC 68-2-27, UL 508, CSA			
<b>Product certifications</b>	CE, UL, CSA			
<b>Temperature</b>	Operation	0...+ 45 °C		
	Storage	- 20...+ 60 °C		
<b>Relative humidity</b>	0...85 % (no condensation)			
<b>Degree of protection</b>	Front panel	IP 65, conforming to IEC 529, Nema 4		
	Rear panel	IP 20, conforming to IEC 529		
<b>Shock resistance</b>	Conforming to IEC 68-2-27 ; semi-sinusoidal pulse 11 ms, 15 gn in the 3 axes			

### Mechanical characteristics

<b>Mounting and fixing</b>	Flush-mounted, fixed with spring clips (supplied) pressure-mounted (on a 1 to 6 mm thick panel)				
	10 spring clips	8 spring clips	12 spring clips	10 spring clips	
<b>Material</b>	Front section	Polyphenyl oxide, 10 % glass fibre (PPO GFN1 SE 1)			
	Keypad	Anti-UV treated toughened polyester (Autoflex EB AG)			
	Enclosure	Polyphenyl oxide, 10 % glass fibre (PPO GFN1 SE 1)			
<b>Keys</b>	Soft keys	8 (with LED)	–	10 (with LED)	–
	Static keys	10 (with LED and re-usable labels)	–	12 (with LED and re-usable labels)	–
	Service keys	12	–	12	–
	Alphanumeric keys	12 + 3	–	12 + 3	–
	keys	for alphabetical access	–	for alphabetical access	–

### Electrical characteristics

<b>LCD screen</b>	Type	5.7" monochrome, back-lit with 16 levels of grey	5.7" STN 256 colours, back-lit with resistive matrix tactile feedback	<b>XBT-F023</b> : 9.5" monochrome, back-lit with 16 levels of grey <b>XBT-F024</b> : 10.4" TFT 256 colours	10.4" TFT 256 colours with resistive analogue tactile feedback
	Resolution	320 x 240 pixels		640 x 480 pixels	
<b>Power supply</b>	Voltage	= 24 V not isolated			
	Limits	18...30 V, maximum ripple 5 %, maximum microbreaks 1 ms			
	Protection	Against polarity inversion and overloads			
<b>Consumption</b>	35 W				

### Operating characteristics

<b>Signalling</b>	1 communication monitoring LED and 1 keypad activity (or tactile feedback activity) LED and 11 LEDs associated with service and alphanumeric keys				
<b>Operating system</b>	Magelis				
<b>Dynamic RAM memory</b>	2.5 Mb				
<b>Application memory</b>	On 2 Mb PCMCIA II card (supplied), 4, 8 or 10 Mb				
<b>Dialogue application</b>	Maximum no. of pages	50 to 450 application, alarm, help, form and recipe pages depending on the memory card used		30 to 300 application, alarm, help, form and recipe pages depending on the memory card used	
	Curves	16 real-time curves		16 real-time curves	
<b>Connections</b>	PLC/ configuration PC	RS 232 C/RS 422/485 insulated serial link, downloadable communication protocols (see page 27 and page 28)			
	Printer	RS 232 C serial link			
	Bus or network	Slot for PCMCIA type III communication card depending on the model, communication protocols (see page 28)			
<b>Real-time clock</b>	Access to the PLC real-time clock				
<b>Alarm relay</b>	1 volt-free N/O contact, max 0.5 A =/~ 24 V				
<b>Connection</b>	Power supply and alarm relay	Plug-in terminal, 5 screw terminals (5.08 mm pitch) Max clamping capacity : 1.5 mm <sup>2</sup>			
	PLC	Female 25-way SUB-D connector			
	Printer/ configuration PC	Male 9-way SUB-D connector

	Rear panel	IP 20, conforming to IEC 529	
<b>Shock resistance</b>	Conforming to IEC 68-2-27 ; semi-sinusoidal pulse 11 ms, 15 gn in the 3 axes		

#### Mechanical characteristics

<b>Mounting and fixing</b>	Flush-mounted, fixed with spring clips (supplied) pressure-mounted (on a 1 to 6 mm thick panel)		
	12 spring clips		10 spring clips
<b>Material</b>	Front section	Polyphenyl oxide, 10 % glass fibre (PPO GFN1 SE 1)	
	Keypad	Anti-UV treated toughened polyester (Autoflex EB AG)	
	Rear enclosure	Zinc-coated steel	
<b>Keys</b>	Soft keys	10 (with LED)	–
	Static keys	12 (with LED and re-usable labels)	–
	Service keys	14	–
	Alphanumeric keys	12 + 3 for alphabetical access	–
<b>Pointing device</b>	Yes, tactile keypad		No

#### Electrical characteristics

<b>LCD screen</b>	Type	9.5" monochrome, back-lit with 16 levels of grey	10.4" TFT 256 colours, back-lit	10.4" TFT 256 colours, back-lit with resistive analogue feedback
	Resolution	640 x 480 pixels		
<b>Power supply</b>	Voltage	= 24 V not isolated		
	Limits	18...30 V, maximum ripple 5 %, maximum microbreaks 1 ms		
	Protection	Against polarity inversion and overloads		
	ISA bus extension	Maximum available at 12 V : 1.2 A, at 5 V : 2 A		
<b>Consumption</b>	80 W			

#### Operating characteristics

<b>Signalling</b>	1 communication monitoring LED and 1 keypad activity (or tactile feedback activity) LED and 11 LEDs associated with service and alphanumeric keys			
<b>Processor</b>	80486 DX4, 100 MHz			
<b>Internal hard disk</b>	1.6 Gb			
<b>Operating system</b>	Windows 95 installed on the hard disk			
<b>Dynamic RAM memory</b>	16 Mb as standard and up to 32 Mb with extension			
<b>Application memory</b>	On hard disk or PCMCIA type II card 2, 4, 8 or 10 Mb			
<b>Dialogue application</b>	Maximum no. of pages	Application, alarm, help, form and recipe pages limited by hard disk capacity Maximum 1024 alarm pages		
	Curves	16 real-time curves, 16 trending curves		
	Adjustment	General screens with 4 front corrector panels, supervision and adjustment screens		
	OLE server	Interface with third-party software (Visual Basic, Excel, etc)		
	<b>Software extension</b>	PL7 Pro Dyn	PLC diagnostic functions, dynamic display of programs, etc	
	Supervision	Web Client Monitor via Intranet/Ethernet TCP/IP		
<b>Connections</b>	PLC	RS 232 C/RS 422/485 isolated serial link, downloadable communication protocols (see page 27)		
	Configuration PC	Non isolated RS 232 C serial link		
	Printer	Parallel link		
	External keypad	PS/2 compatible link		
	Bus or network	Slot for type II or III PCMCIA communication card, communication protocols (see Schneider Software Pack page 27)		
	ISA bus cards	Depending on the model, two 2/3 format slots (network, TSX Premium coprocessor connection, etc)		
<b>Real-time clock</b>	Incorporated and backed-up			
<b>Alarm relay</b>	1 volt-free N/O contact, max 0.5 A ~/~ 24 V			
<b>Connection</b>	Power supply and alarm relay	Plug-in terminal, 5 screw terminals (5.08 mm pitch) Max clamping capacity : 1.5 mm <sup>2</sup>		
	PLC	High-density female 26-way SUB-D connector and <b>T CCX CB 10</b> cable with female 25-way SUB-D connector (PLC side)		
	Configuration PC	Male 9-way SUB-D connector		
	Printer	Female 25-way SUB-D connector		
	External keypad	8-way mini-DIN connector
